Subject: RE: IS facilities
Region 9 Interim Status Facilities.docx

Hi Caleb,

I called Anthony and sent him an email and have not heard back to verify the status of the 4 AZ IS facilities.

However, attached (and following) is the revised info as I know it now. I will verify this info once I hear back from Anthony.

Region 9 Interim Status Facilities:

Nevada: None

Hawaii: None

Arizona:

1. **BEAN AND CO** – This facility undergoing closure. The PRP was bankrupt. Our recommendation to ADEQ is to transfer this facility to Corrective Action or Superfund and get it out of the Interim Status for permitting baseline. Waiting on an answer back from ADEQ.

2. **CLEAN HARBORS ARIZONA, LLC** – Facility is undergoing closure. It has two units. One unit is remaining as Interim Status Inactive, but not RCRA closed (ISIN). ADEQ is working on issuing this unit a Post Closure permit.

3. **NAMMO TALLEY, INC.** – Facility is undergoing closure. It has one unit that is Interim Status Inactive, but not RCRA closed (ISIN). ADEQ is working on issuing this unit a Post Closure permit.

4. **WORLD RESOURCES CO** – Tolleson, AZ)- Operating facility. Dries out sludge residue from plating operations which is then shipped to smelters to recover Chromium. We are currently providing technical assistance to ADEQ on air issues. ADEQ is working issuing a permit for this operating facility.

California:

5. **Exide** (Vernon, CA) - Have ceased operations under a DTSC order until they can upgrade their facility and demonstrate they can operate in a protective manner.

Guam:

6. **Naval Base Guam Munitions Site** (Santa Rita, Guam) - While listed as IS, we need to determine if the site needs a RCRA permit. They are an LQG, do 90-day storage, and operate a explosive detonation range which the Navy contends is for training purposes and does not need a RCRA permit. We've communicated with Guam EPA, and have asked Jennifer Downy-Macarther to visit the site when she is out on Guam later this month.

Region 9:

7. **Siemens** (Parker, AZ)- We are currently working on a permit decision for this facility. It is anticipated that the permit decision will be made by the end of this calendar year
